

Il marchio Helvetia contraddistingue gli utensili da taglio e manuali distribuiti dalla Allfix.

Si tratta di prodotti selezionati per uso professionale. In particolare i dischi abrasivi e le punte per trapano Helvetia sono da sempre riconosciuti e apprezzati sul mercato come prodotti di riferimento nell'utilizzo professionale e industriale.

La gamma è stata ulteriormente arricchita e aggiornata secondo le nuove tendenze e le nuove richieste di mercato.

Helvetia è precisione svizzera e versatilità italiana.

The Helvetia brand distinguishes the cutting and manual tools distributed by Allfix.

These products are selected for professional use. In particular the abrasive disks and Helvetia drill bits are recognized and appreciated on the market as reference products in the professional and industrial applications.

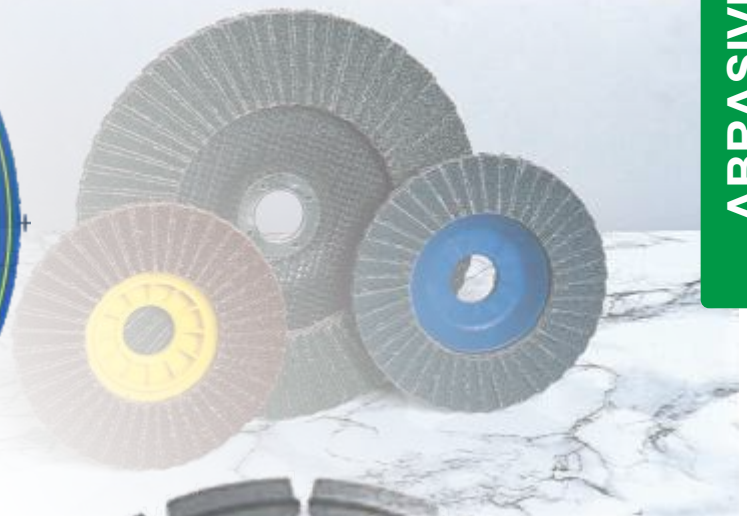

The range has been further enriched and updated according to the new trends and the new market demands.

Helvetia is Swiss precision and Italian versatility.

DA - Blades for steel and cast iron

CHARACTERISTICS: ALLFIX abrasive discs are produced in Italy with high quality raw materials. The DA are suitable for cutting normal and medium alloyed steels and steel cast irons. For medium-large sections it is advisable to use powerful grinders (2400 W), while for medium-small sections it is possible to use low power grinders (1800-2000 W). Our discs are characterized by a high cutting speed and good durability.

DA23065	230 x 6,5	25	5,15

MADE IN ITALY

DA - Thin cutting discs for steel

CHARACTERISTICS: Discs for cutting all types of untreated steels. They combine excellent cutting capacity with considerable durability. Recommended for all applications, including cutting of laminations, springs, gratings, etc. They are distinguished by the low removal of material and consequently for the low power absorption, the low heating of the piece to be cut and the very limited production of burrs.

Abrasive Diamond discs

ABRASIVE DISC

Codice Code	Descrizione Size		€ x 1 box
----------------	---------------------	---	--------------

DDS - Universal diamond blades with segmented crown

CHARACTERISTICS: This disc offers high durability and a high cutting speed on abrasive materials. It is ideal for sandstone, concrete, concrete, terracotta, brick, poroton, refractory.

DDS1115	115	1	9,65
DDS1230	230	1	27,30

DDT - Universal turbo rim diamond blades

CHARACTERISTICS: This disc is used to quickly cut even the hardest materials. It guarantees a high reliability of execution and a good duration. It is ideal for concrete, terracotta, brick, poroton.

DDT1115	115	1	10,25
DDT1230	230	1	27,95

DDC - Continuous rim diamond blades for ceramic

CHARACTERISTICS: This disc model guarantees a perfect cut finish on any ceramic tile thanks to the continuous diamond band.

DDC1115	115	1	7,15
DDC1230	230	1	24,55

68 - Discs for circular saws for wood

CHARACTERISTICS: Cutting discs for wood and plastic in chrome-vanadium steel, suitable for use with circular saws at slow speeds. They are individually packaged.
